

MME Local Government Internship Contacts

The following is a list of municipalities and contact information for those communities that are open to being approached by students interested in a local government internship. The availability and funding for any potential internship position is determined by each individual community at the point of contact from the student. Since each community's requirements for an internship are different and each student's situation is unique, students are encouraged to contact a community to discuss whether an internship would be a good fit at that time. Municipalities marked with (\$) offer paid internships. *Updated 08-2021*
